LESSON 29 · DAILY PRACTICE

Full Simulation 08

실전 15문항 먼저 답하기 → 해설 | 모범답변은 실제 생활에 맞게 바꾸는 연습 예시입니다.

오늘의 학습 구조

Q1	자기소개: 직업·가족·균형 습관
Q2-Q4	영화: 극장 묘사·관람 루틴·좌석 문제 경험
Q5-Q7	여행: 가족여행 계획·일정 변경 경험·계획 방식 변화
Q8-Q10	재활용: 가정 루틴·분류 오류 경험·제도 변화
Q11-Q13	도서관: 공간 문의·예약 누락 해결·관련 경험
Q14-Q15	심화: 극장/집 관람 비교·책임 있는 관광

훈련 원칙
짧은 완성 문장으로 시작한 뒤 장소, 활동, 이유, 결과를 한 덩어리씩 추가하세요. 답변 전체를 외우기보다 구조를 재사용합니다.

주의
등급이 올라가도 사실관계를 바꾸지 않습니다. 같은 정보에 구체 묘사와 연결어만 더해 질문 요구사항을 빠뜨리지 않습니다.

Q1 · INTRODUCTION

Full Simulation 08

직업과 가족생활을 소개한 뒤 실제로 유지하는 균형 습관과 그 습관이 도움이 되는 이유를 연결하세요.

Please introduce yourself. Tell me about your work, your family, and one habit that helps you stay balanced.

IL

I am an engineer and I live with my family. I work during the week. A short walk helps me relax.

IM

I work as an engineer, and most weekdays are busy. I enjoy having dinner and talking with my family after work. To stay balanced, I take a short walk or stretch instead of checking my phone all evening.

IH

I am an engineer, so my weekdays require concentration and careful planning. At home, I value simple time with my family because it helps me separate work from the rest of my life. One habit that keeps me balanced is taking a short walk after dinner. I do not treat it as intense exercise. It is a realistic routine that clears my mind and gives me time to talk with my family.

AL

I work as an engineer, and my daily life is shaped by technical responsibilities at work and family responsibilities at home. After a demanding day, I appreciate ordinary moments such as sharing dinner, helping with a small task, or talking about what happened. A habit that keeps me balanced is taking a short walk after dinner. I used to think exercise had to be long and difficult to matter, but that expectation made consistency harder. Now I focus on a routine that fits my real schedule. The walk gives me light exercise, time with my family, and a clear transition out of work mode.

CHECK · shape my daily life / fit my real schedule / transition out of work mode

Q2 · MOVIES · DESCRIPTION

Full Simulation 08

위치와 접근성, 로비와 상영관 시설, 관객층, 자신에게 편리한 이유 순서로 묘사하세요.

Describe a movie theater you often visit. Tell me about its location, facilities, atmosphere, and the kinds of people who go there.

IL

There is a movie theater near a shopping mall. It has comfortable seats and a large screen. Families and young people go there.

IM

A movie theater I visit is inside a shopping mall near my home. It has several screens, comfortable seats, and a clean lobby. Families, couples, and groups of friends usually go there, especially on weekends.

IH

The theater I visit most often is located in a large shopping mall, so parking and public transportation are convenient. The lobby is bright, and there are several ticket machines as well as a staffed counter. Inside, the seats are comfortable and the sound is clear without being painfully loud. I usually see families during the day and couples or groups of friends in the evening. The atmosphere becomes busy before popular movies but settles down quickly once the screening begins.

AL

The movie theater I use most often is on the upper floor of a shopping mall about fifteen minutes from my home. Its main advantage is convenience: it has reliable parking, easy access to restaurants, and several screens with different showtimes. The lobby can be crowded, but the ticket area is organized and the theaters themselves are generally clean. The seats have enough space, and the sound is powerful without overwhelming the dialogue. Weekend audiences include families, couples, teenagers, and older moviegoers. I like the place because I can plan a complete outing around one location instead of driving between several places.

CHECK · easy access / organized ticket area / plan a complete outing

Q3 · MOVIES · ROUTINE

Full Simulation 08

영화 선택 기준, 좌석 예약, 도착 후 준비, 관람 예절, 관람 후 대화 순서로 설명하세요.

Walk me through what you usually do when you go to see a movie, from choosing the film to returning home.

IL

I check the showtimes and buy tickets. I arrive early, find my seat, and watch the movie. Afterward, I go home.

IM

I first choose a movie that my family or friends can enjoy. I check showtimes, reserve seats, and arrive about twenty minutes early. After the movie, we talk about our favorite scenes and then head home.

IH

When I decide to see a movie, I compare the story, running time, and available showtimes before booking. I prefer reserving seats in advance so that no one has to sit separately. On the day, I arrive early enough to use the restroom and buy a drink without rushing. I silence my phone before the previews begin. After the movie, I usually discuss the ending with the people who came with me and then return home.

AL

My movie routine begins with deciding whether the film suits the people joining me rather than simply choosing the newest release. I check the running time, age rating, and several showtimes, then reserve seats where everyone can see comfortably. I arrive about twenty minutes early because rushing through the lobby makes the experience less enjoyable. Before the previews, I silence my phone and settle anything I need. After the screening, I like to talk about one or two memorable scenes instead of immediately reading online reviews. That conversation often becomes as enjoyable as the film itself, and then we head home.

CHECK · suits the people joining me / without rushing / memorable scenes

Q4 · MOVIES · MEMORABLE EXPERIENCE

Full Simulation 08

원래 계획, 좌석 문제, 확인 자료, 직원에게 요청한 해결, 결과와 교훈을 과거 시제로 연결하세요.

Tell me about a memorable movie outing when something did not go as planned. What happened, and how did you handle it?

IL

I went to a movie, but our seats were double-booked. I showed the tickets to an employee. We received new seats and watched the movie.

IM

Once, another family was sitting in our reserved seats. We compared the tickets and discovered that both reservations showed the same numbers. I asked an employee for help, and the theater moved us to similar seats before the movie started.

IH

One memorable outing began when another family was sitting in the seats we had reserved. At first, we all assumed someone had read the row number incorrectly, but both mobile tickets showed the same seats. I took screenshots and spoke with an employee instead of arguing in the theater. The employee confirmed a system error and found several seats together in another section. We missed only the first preview, and the calm conversation prevented an uncomfortable conflict.

AL

A memorable movie outing involved a double booking that could easily have turned into an argument. When we reached our row, another family was already in the seats printed on our mobile tickets. We compared the details and realized that both reservations displayed the same numbers, so neither group was at fault. I saved screenshots, stepped into the lobby, and explained the issue to an employee. The theater located comparable seats together and gave both families drink vouchers for the inconvenience. We missed only part of the previews. The experience reminded me to solve the record mismatch rather than treating the other customer as the problem.

CHECK · double booking / neither group was at fault / record mismatch

Q5 · TRAVEL · PLANNING ROUTINE

Full Simulation 08

가족의 우선순위, 이동수단, 숙소, 예산, 여유 시간 순서로 계획 과정을 설명하세요.

How do you normally plan a family trip? Explain how you choose transportation, accommodation, activities, and a budget.

IL

I choose dates and a destination with my family. I book transportation and a hotel. Then I make a simple budget and activity list.

IM

When planning a family trip, I first confirm everyone's available dates and interests. I compare transportation and hotels, then reserve the important items. I set a budget for meals, tickets, and shopping, but I leave some free time.

IH

I begin family travel planning by agreeing on dates and one or two priorities rather than trying to satisfy a long list. Then I compare transportation by total travel time, not only price, and choose accommodation near the main activities. After booking the essentials, I make a daily outline and estimate meals, tickets, and local transportation. I also keep some unscheduled time because a family trip becomes stressful when every hour is fixed.

AL

My family travel planning starts with a short conversation about dates, energy levels, and the one experience each person values most. I compare transportation using total cost, travel time, and arrival convenience instead of focusing on the cheapest fare alone. For accommodation, I prioritize a safe location and easy access to the places we will actually visit. Once the major reservations are confirmed, I divide the budget into meals, admission tickets, local transportation, and a small emergency amount. I create a flexible daily outline with one main activity and optional choices. That structure prevents confusion while leaving room for weather, fatigue, or unexpected discoveries.

CHECK · total travel time / major reservations / flexible daily outline

Q6 · TRAVEL · MEMORABLE EXPERIENCE

Full Simulation 08

돌발상황 확인, 공식 정보 확인, 대체 장소 선택, 일정 조정, 결과와 교훈을 사건 흐름으로 말하세요.

Tell me about a memorable family trip when an unexpected delay or closure forced you to change your plan.

IL

On a family trip, heavy rain closed an outdoor attraction. We visited a museum instead. The new plan was enjoyable.

IM

During one trip, heavy rain caused an outdoor attraction to close. I checked nearby indoor options and found a museum that everyone could enjoy. We changed the schedule, had lunch nearby, and still had a good day.

IH

On a family trip, we planned to spend most of the day at an outdoor attraction, but heavy rain led to a sudden closure. Rather than waiting at the entrance, I checked the official notice and searched for indoor places nearby. A museum had same-day tickets, so I reserved them on my phone and moved lunch earlier. The replacement activity was less exciting at first, but everyone relaxed and enjoyed it. We returned to the outdoor plan on another day.

AL

One memorable family trip changed completely when heavy rain forced an outdoor attraction to close shortly before our visit. I first checked the official notice to confirm that the closure was real and not a temporary delay. Then I looked for indoor options within a reasonable travel distance and found a museum with same-day admission. I reserved tickets, moved lunch earlier, and explained the revised schedule so that no one felt rushed. The museum turned out to be engaging, and the slower pace gave us time to recover. We visited the original attraction later in the trip. The experience showed me that a useful backup plan protects the mood, not just the schedule.

CHECK · official notice / revised schedule / protect the mood

Q7 · TRAVEL · CHANGE

Full Simulation 08

과거와 현재를 정보량, 예약 방식, 현장 대응, 피로도라는 같은 기준으로 비교하고 현실적인 사용 원칙을 제시하세요.

How has family travel planning changed compared with the past? Discuss both improvements and new problems.

IL

In the past, people used guidebooks and travel agencies. Now they use apps and online reviews. Planning is easier, but too much information can be confusing.

IM

Family travel planning is faster now because people can compare flights, hotels, maps, and reviews online. In the past, choices were more limited. However, changing prices and too many reviews can create stress and make people keep searching.

IH

In the past, travelers relied more on guidebooks, agencies, and recommendations from people they knew. Today, a phone can compare prices, reserve rooms, translate signs, and update a route immediately. That flexibility makes independent travel easier. The drawback is information overload. Prices change, reviews conflict, and people may spend more time optimizing the trip than enjoying it. Good planning now requires knowing when to stop comparing.

AL

Family travel planning has shifted from limited information to continuous information. In the past, travelers often accepted a package, used a printed guidebook, or trusted a small number of recommendations. Today, people can compare transportation, accommodation, maps, reviews, and opening hours in real time. This makes personalized trips far more accessible and helps families react quickly to changes. At the same time, endless comparison can produce anxiety, and popular online recommendations can make different trips look identical. I think modern tools are valuable when travelers define their priorities first, verify important facts with official sources, and stop searching once a reasonable decision has been made.

CHECK · continuous information / information overload / official sources

Q8 · RECYCLING · ROUTINE

Full Simulation 08

분리 항목, 세척과 건조, 애매한 품목 확인, 배출일, 가족 역할 순서로 구체적으로 설명하세요.

Describe how recycling is handled in your home. What do you separate, when do you take it out, and how does your family share the work?

IL

We separate paper, plastic, glass, and cans. We rinse containers and take them out on the collection day. My family shares the work.

IM

At home, we keep separate containers for paper, plastic, cans, glass, and regular waste. We rinse food containers and remove labels when required. Before collection day, one person checks the bags and another carries them outside.

IH

My family handles recycling with a simple routine. We separate paper, plastic, cans, glass, and food waste as soon as possible so that the kitchen does not become cluttered. Containers are rinsed and dried, and we check local instructions for items that are difficult to classify. On collection day, I usually inspect the bags while another family member helps carry them out. Sharing the process makes it faster and reduces mistakes.

AL

Recycling at home works best when the sorting happens immediately rather than at the last minute. We use separate spaces for paper, plastic, metal, glass, food waste, and general trash. Food containers are rinsed and allowed to dry, and labels or mixed materials are removed when local rules require it. Before the scheduled collection, I check questionable items against the community instructions instead of guessing. Family members divide the work: one person gathers and inspects the materials, while another carries them to the collection area. The routine is not complicated, but consistency prevents contamination and keeps the home organized.

CHECK · sort immediately / questionable items / prevents contamination

Q9 · RECYCLING · UNEXPECTED PROBLEM

Full Simulation 08

수거 거부 상황, 표식 확인, 공식 안내 조회, 재질 분리, 다음 배출 결과와 교훈을 말하세요.

Tell me about a time when you discovered that something had been sorted incorrectly or could not be collected. What did you do?

IL

I put a mixed-material item in the wrong bin. It was not collected. I checked the rules, separated the parts, and put it out correctly later.

IM

Once, a package with plastic and metal parts was left behind at the collection area. I checked the local recycling guide and learned that the materials had to be separated. I took it home, divided the parts, and disposed of them correctly the next week.

IH

I once found that a large package had been left behind after collection. A note explained that the item contained mixed materials and could not be accepted in one piece. I photographed the label, brought the package home, and checked the community recycling guide. The plastic cover, metal frame, and regular waste had different destinations. I separated them safely and placed each part in the correct category on the next collection day.

AL

An unexpected recycling problem occurred when a bulky package I had placed in the collection area was rejected. The item looked like plastic, but it also contained a metal frame and a layer that could not be recycled. Instead of leaving it beside the bins, I took it back home and checked the official community guide using the product label. I carefully separated the removable plastic and metal parts, then treated the remaining material as general waste. On the next collection day, every part was accepted. The experience taught me that visual appearance is not enough for mixed products and that correcting a mistake is better than passing the problem to someone else.

CHECK · mixed materials / official community guide / correcting a mistake

Q10 · RECYCLING · CHANGE

Full Simulation 08

수거 체계와 정보 개선을 설명한 뒤 지역별 차이와 복합 재질 문제, 제도와 제품 설계의 해결책을 제시하세요.

How has recycling changed in recent years? Explain useful improvements as well as difficulties people still face.

IL

Recycling rules are more detailed now. People have better collection bins and more information. But mixed materials are still confusing.

IM

Recycling has become more organized with labeled bins, collection schedules, and online guides. Some packaging is also easier to separate. However, rules can differ by area, and products made from several materials remain difficult.

IH

In recent years, recycling has become more visible and structured. Collection areas use clearer labels, local governments publish detailed guides, and some companies design packaging that is easier to separate. These changes reduce guesswork. Still, residents face inconsistent rules and products made from several materials. If instructions are too complicated, people may give up or sort by appearance. Clearer product labels and simpler local guidance would help.

AL

Recycling has improved through better collection systems, clearer public information, and growing attention to packaging design. Many communities now provide detailed online guides, scheduled collection, and labeled spaces for different materials. Some manufacturers also make labels and caps easier to remove. The remaining difficulty is complexity: rules vary by location, and a single product may combine plastic, foil, paper, and adhesive. Consumers cannot solve every design problem through careful sorting. I believe progress requires simpler local instructions, standardized material labels, and products designed for separation from the beginning. Convenience matters because a system followed consistently is more effective than an ideal system that ordinary households cannot use correctly.

CHECK · reduce guesswork / standardized material labels / designed for separation

Q11 · ROLE-PLAY · LIBRARY ROOM INQUIRY

Full Simulation 08

실제 의문문으로 가능한 시간, 수용 인원, 장비, 이용 시간, 취소 조건 중 네 가지 이상을 구체적으로 물으세요.

You want to reserve a quiet room at a public library for a family study session. Call the library and ask three or four questions about availability, room size, equipment, time limits, and cancellation rules.

IL

Hello, I want to reserve a quiet room. Is one available on Saturday? How many people can use it? Is there a screen, and how long can we stay?

IM

Hello, I would like to reserve a quiet room for my family this Saturday. Could you tell me what times are available and how many people the room holds? Does it have a screen or power outlets? I would also like to know the time limit and cancellation rule.

IH

Hello, I am calling to reserve a quiet room for a family study session this Saturday. Could you tell me which morning or afternoon times are still available? We will have three people, so I need to confirm the room capacity. Does the room include a monitor, a whiteboard, and accessible power outlets? How long can one reservation last? Finally, what is the deadline for canceling without losing future booking privileges?

AL

Hello, I would like to reserve a quiet room at the library for a family study session this Saturday. Could you tell me which time slots are available between late morning and early afternoon? There will be three of us, so I would like to confirm the room's maximum capacity and whether everyone needs a library card. Does the room have a monitor, a whiteboard, and enough power outlets for two laptops? I also need to know the maximum reservation length and whether we may extend it if no one is waiting. Finally, what is the cancellation deadline, and is there any penalty for a late cancellation?

CHECK · available time slots / maximum capacity / cancellation deadline

Q12 · ROLE-PLAY · LIBRARY ROOM PROBLEM

Full Simulation 08

확인 자료와 공개 좌석이 적합하지 않은 이유를 설명하고, 대기 후 이용·다른 지점 연계·무불이익 재예약을 서로 다른 대안으로 제시하세요.

You arrive at the library, but your room reservation is missing, and only a noisy open table is available. Explain the problem and suggest two or three alternatives.

IL

Hello, my room reservation is missing. I have the confirmation. Could we wait for another room, use a room at another branch, or change the reservation?

IM

Hello, I reserved a quiet room, but the booking is not in the system and the open table is too noisy. I can show the confirmation message. Could we wait for the next available room, move to a nearby branch, or reschedule without a penalty?

IH

Hello, I need help with a missing room reservation. My confirmation shows today's date and time for three people, but the system has no record, and the open table will not work for our study session. Could you check whether another room will open soon and let us wait? If not, could a nearby branch honor the confirmation? A third option would be a priority reservation for the next suitable time without a penalty.

AL

Hello, I would like to resolve a reservation problem. I have a confirmation showing a quiet room for three people at this time, but the booking is missing from the library system. The only space offered is an open table beside a busy walkway, which is not suitable for the focused session we planned. Could you first check whether a room will become available within the next thirty minutes and allow us to wait nearby? If not, could you contact another branch and ask it to honor this confirmation today? A third option would be moving the reservation to the earliest suitable time and protecting our booking privileges. Please confirm which solution is possible now.

CHECK · honor this confirmation / wait nearby / protect our booking privileges

Q13 · ROLE-PLAY · RELATED EXPERIENCE

Full Simulation 08

전화 질문이 아니라 과거 경험으로 배경, 확인 자료, 직원과의 해결 과정, 결과와 교훈을 서술하세요.

Tell me about a past experience when a room, ticket, or service reservation was missing or incorrect. Describe the problem, how you handled it, and the outcome.

IL

I once had a missing reservation at a community center. I showed the confirmation email. The staff found another room, and the activity started late.

IM

Once, a room reservation at a community center did not appear in the system. I showed the confirmation email and payment record. The staff checked the reference number and found another room. We started a little late, but the activity continued.

IH

I once arrived at a community center and learned that the room I had reserved was not listed under my name. I checked my email and showed the date, reference number, and payment receipt to the employee. The reservation had been entered under a shortened name. While the record was corrected, the staff offered a smaller room nearby. We accepted it, started about fifteen minutes late, and kept the original price. Having clear evidence made the solution much easier.

AL

A related problem happened when a community center could not find the room reservation I had made for a family activity. Before reacting, I opened the confirmation email and verified the date, payment, and reference number. The employee searched again and discovered that the reservation had been entered under an abbreviated version of my name. Because the original room was already occupied, the center offered a slightly smaller room and extended our end time by fifteen minutes. We accepted the alternative and kept the original price. The experience taught me to keep confirmation details available and to focus on a workable solution rather than arguing about who caused the error.

CHECK · reference number / workable solution / kept the original price

Q14 · ADVANCED COMPARISON · MOVIES

Full Simulation 08

화면과 음향, 집중, 시간 통제, 비용, 가족 활동이라는 같은 기준으로 두 방식을 비교하고 상황별 선택을 말하세요.

Compare watching a movie in a theater with watching it at home. What does each experience do well, and when would you choose one over the other?

IL

A theater has a large screen and strong sound. Home is comfortable and cheaper. I choose a theater for special movies and home for convenience.

IM

A movie theater offers a large screen, focused attention, and shared excitement. Watching at home is more comfortable, flexible, and affordable. I choose the theater for visually impressive films or family outings, and home for casual viewing.

IH

Theater viewing creates concentration through a large screen, strong sound, and a shared audience. It also requires travel, fixed times, and higher cost. Home viewing offers control over timing, volume, and breaks, which is useful for busy families. However, distractions can weaken attention. I choose the theater when the film benefits from scale or when the outing matters, and home when flexibility is more important.

AL

Watching a movie in a theater and watching at home serve different purposes. A theater provides scale, controlled sound, darkness, and a shared audience, all of which encourage sustained attention. It can turn a film into a family outing, but it also involves travel, fixed showtimes, and added cost. Home viewing offers flexibility, privacy, and the ability to pause, which suits busy schedules or casual films. The weakness is that phones, chores, and conversation can interrupt the story. I choose the theater for visually ambitious releases or meaningful outings, while home is better when comfort and timing matter more than immersion.

CHECK · sustained attention / fixed showtimes / comfort and timing

Q15 · ADVANCED OPINION · RESPONSIBLE TRAVEL

Full Simulation 08

관광의 이익을 인정한 뒤 여행자, 행정기관, 사업자의 책임과 주민 생활 보호 원칙을 균형 있게 제시하세요.

Popular destinations benefit from tourism, but residents may face crowds, noise, and rising costs. What responsibilities do travelers and local authorities have?

IL

Tourism brings money and jobs, but it can create crowds and noise. Travelers should follow rules and respect residents. Local authorities should manage visitors and protect neighborhoods.

IM

Tourists should spend responsibly, follow local rules, and avoid disturbing residential areas. Local authorities should provide clear information, manage crowded places, and use tourism income for public services. Both sides need balance.

IH

Tourism can support local businesses and cultural sites, but unmanaged crowds can disrupt daily life. Travelers should learn basic rules, control noise, reduce waste, and avoid treating residential streets as attractions. Local authorities should publish clear guidance, limit access when necessary, and direct revenue toward transportation, sanitation, and preservation. Businesses also need fair standards. Responsible tourism requires benefits to be visible to residents, not only visitors.

AL

Tourism can create jobs, support small businesses, and finance cultural preservation, but those benefits do not justify unlimited pressure on residents. Travelers have a responsibility to learn local rules, control noise, reduce waste, and remember that attractive neighborhoods are still people's homes. Local authorities should provide clear multilingual guidance, manage capacity at crowded sites, and invest tourism revenue in transportation, sanitation, and preservation. They should also consult residents before expanding visitor facilities. Businesses can help by discouraging disruptive behavior and spreading demand beyond a few famous locations. A destination remains sustainable only when visitors receive a meaningful experience and residents can continue ordinary life with dignity.

CHECK · unlimited pressure / manage capacity / ordinary life with dignity

FINAL REVIEW · FULL SIMULATION

Simulation Quick Review

질문의 요구사항을 먼저 채우고, 등급별로 세부 정보만 확장합니다.

재사용 핵심 표현

Q4	double booking, neither group was at fault, record mismatch
Q7	continuous information, information overload, official sources
Q11	available time slots, maximum capacity, cancellation deadline
Q12	honor this confirmation, wait nearby, protect our booking privileges
Q13	reference number, workable solution, kept the original price

실전 모의고사 운영 순서

STEP 1	학습자료를 덮고 음성 질문마다 60초 직접 답변
STEP 2	15문항을 모두 푼 뒤 해설 구간 청취
STEP 3	문의 4개 이상, 대안 2개 이상, 관련 경험의 사건 흐름 점검
STEP 4	녹음에서 반복된 실수 2개만 선택해 수정
STEP 5	다음 연습에서는 자료 없이 다시 발화

마지막 점검
1. 15문항을 먼저 직접 답했는가? 2. 도서관 정보 문의에서 질문을 4개 이상 했는가? 3. 예약 누락 문제에서 서로 다른 대안을 2개 이상 제시했는가?
4. 관련 경험을 과거 시제로 사건·행동·결과까지 설명했는가?
