LESSON 36 · DAILY PRACTICE

Full Simulation 15

실전 15문항 먼저 답하기 → 해설 | 모범답변은 실제 생활에 맞게 바꾸는 연습 예시입니다.

오늘의 학습 구조

Q1	자기소개
Q2–Q4	동네 묘사·경험·변화
Q5–Q7	요리 일상·기억·습관 변화
Q8–Q10	날씨 선호·돌발 경험·계절 적응
Q11–Q13	온라인 쇼핑 문의·파손 해결·관련 경험
Q14–Q15	주거 환경 비교·온라인 쇼핑 의견

훈련 원칙
짧은 완성 문장으로 시작한 뒤 장소, 활동, 이유, 결과를 한 덩어리씩 추가하세요. 답변 전체를 외우기보다 구조를 재사용합니다.

주의
등급이 올라가도 사실관계를 바꾸지 않습니다. 같은 정보에 구체 묘사와 연결어만 더해 질문 요구사항을 빠뜨리지 않습니다.

Q1 · 자기소개

Full Simulation 15

직업과 생활 환경을 간단히 밝힌 뒤 동네 활동과 집에서 하는 일상을 연결하세요.

Please introduce yourself and explain how your neighborhood and daily routines affect the way you spend your free time.

IL

I work during the week and live in a quiet neighborhood. I often walk nearby and cook at home.

IM

I work during the week and live in a convenient neighborhood. After work, I often take a short walk or cook dinner at home. These simple routines help me relax.

IH

I have a fairly regular work schedule, so my surroundings shape how I use my free time. My neighborhood has useful shops and quiet streets, which makes a short evening walk easy. I also enjoy cooking at home because it gives me a practical way to slow down after work.

AL

I work on weekdays, and the place where I live has a strong influence on how I spend my free time. My neighborhood is not especially famous, but it is convenient and calm enough for ordinary routines. When the weather is comfortable, I take a short walk after work and notice what has changed around the streets. On other evenings, I stop at a nearby store and cook at home. I used to think free time required a special plan. Now I value small activities that fit naturally into my day and help me recover from a busy schedule.

CHECK · fit naturally into my day / a convenient neighborhood

Q2 · 동네 묘사

Full Simulation 15

주거 환경, 가까운 시설, 교통과 선호 이유를 구체적인 거리감과 함께 묘사하세요.

Describe your neighborhood in detail. What places are nearby, and what do you like about living there?

IL

My neighborhood is quiet and convenient. There are small stores, a park, and a bus stop near my home.

IM

I live in a mostly quiet neighborhood with a few useful places nearby. There is a grocery store, a small park, and public transportation. I like being able to handle everyday errands without traveling far.

IH

My neighborhood is a residential area with a practical mix of homes and small businesses. A grocery store and a pharmacy are within walking distance, and there is a park where people exercise. I especially like that the streets are usually calm while public transportation is still easy to reach.

AL

My neighborhood is mainly residential, but it has enough small businesses to make daily life convenient. Within a short walk, I can reach a grocery store, a pharmacy, a bakery, and a bus stop. There is also a modest park with a path that residents use in the morning and evening. What I appreciate most is the balance. The area is calm enough that I can rest at home, yet I do not have to travel far for basic errands. It is not a tourist destination, but that ordinary convenience is exactly what makes it comfortable for me.

CHECK · within walking distance / a practical mix

Q3 · 동네 경험

Full Simulation 15

우연히 본 상황, 제안한 도움, 짧은 대화와 이후 관계 변화를 시간 순서로 말하세요.

Tell me about a memorable interaction you had with a neighbor or someone in your community.

IL

I once helped a neighbor carry a heavy box. We talked for a few minutes, and I felt closer to my community.

IM

One evening, I saw an older neighbor struggling with a large package. I offered to carry it to the elevator. We talked briefly, and she later greeted me whenever we met. The small interaction made the building feel friendlier.

IH

A memorable interaction happened when a neighbor received a package that was too heavy to move alone. I was returning home, so I offered to help carry it upstairs. While we waited for the elevator, we introduced ourselves and talked about the building. After that, we began greeting each other regularly.

AL

One evening, I was walking into my building when I noticed an older neighbor trying to move a large delivery box. She had managed to bring it through the entrance, but it was clearly too awkward to carry to the elevator. I offered to help, and we moved it together. During the short ride upstairs, we introduced ourselves and discovered that we had lived on nearby floors for quite a while without speaking. After that day, we started greeting each other and occasionally sharing useful building information. I remember it because a very small act made the place feel more like a community.

CHECK · offer to help / feel like a community

Q4 · 동네 변화

Full Simulation 15

과거와 현재를 편의성과 혼잡이라는 같은 기준으로 비교하고 개선 의견을 덧붙이세요.

How has your neighborhood changed over time? Compare the past with the present and explain your opinion.

IL

There are more stores and delivery vehicles now. Life is more convenient, but the streets are busier.

IM

My neighborhood used to have fewer shops and less traffic. Now there are more services and delivery vehicles. Everyday life is easier, although the area can feel crowded during busy hours.

IH

In the past, my neighborhood was quieter but less convenient. Residents often traveled farther for groceries or other services. Several small businesses have opened, and deliveries have become common. I appreciate the convenience, but parking and traffic have become more noticeable.

AL

The neighborhood has gradually become more convenient and more crowded. A few years ago, there were fewer shops, so residents often had to travel to a larger commercial area for basic errands. Now we have more food options, better delivery service, and several useful stores nearby. Those changes save time, especially on busy weekdays. The drawback is that delivery vehicles and short-term parking create congestion around the entrances. Overall, I prefer the present situation, but I think the community needs clearer loading areas and better rules so that convenience does not reduce safety.

CHECK · gradually become / the drawback is

Q5 · 요리 일상

Full Simulation 15

메뉴보다 계획 순서와 재료 선택 기준, 정리까지 이어지는 일상을 설명하세요.

What do you usually cook at home? Describe how you plan and prepare a typical meal.

IL

I usually cook rice, soup, and a simple side dish. I check what I have and prepare the ingredients first.

IM

I often make a simple meal with rice, vegetables, and some protein. Before cooking, I check the refrigerator and choose ingredients that need to be used. I prepare everything first so the cooking process is easier.

IH

On weekdays, I usually cook practical meals that do not require many dishes. I start by checking the refrigerator and selecting one main ingredient. Then I wash and cut the vegetables before heating the pan. Planning the order saves time and helps me avoid wasting food.

AL

Most of my weekday meals are simple combinations of rice, vegetables, and a main ingredient such as eggs, tofu, or chicken. I begin by checking what is already in the refrigerator, especially anything that should be used soon. Once I choose the meal, I wash and cut the ingredients before turning on the stove. That small step keeps the process organized and prevents one part from cooking while I am still preparing another. I am not trying to produce restaurant food. My goal is a balanced meal that I can finish, clean up, and enjoy without making the evening stressful.

CHECK · check the refrigerator / keep the process organized

Q6 · 요리 기억

Full Simulation 15

누구를 위해 무엇을 준비했는지, 걱정과 준비 전략, 상대 반응을 과거 시제로 연결하세요.

Tell me about a time you cooked for other people. What did you make, and how did they react?

IL

I once cooked pasta for my family. I was nervous, but they enjoyed it and asked for more.

IM

I once made pasta and salad for a family dinner. I prepared the sauce earlier than usual because I did not want to rush. My family liked the meal, and I felt proud that everyone ate together.

IH

A memorable cooking experience was preparing dinner for my family on a weekend. I chose pasta because I could make the sauce in advance and adjust the portions easily. I worried that it might be too salty, but everyone enjoyed it. Their reaction made the effort feel worthwhile.

AL

One weekend, I offered to prepare dinner for my family because everyone had been busy. I chose pasta with a tomato-based sauce and made a simple salad. Since I did not want to be stuck in the kitchen while everyone was talking, I prepared the sauce early and finished the pasta just before we ate. I was nervous about the seasoning, so I served extra cheese separately. My family relaxed, enjoyed the meal, and asked how I had made the sauce. What I remember most is not the recipe itself but the feeling that cooking created an easy reason for us to sit together.

CHECK · prepare in advance / make the effort worthwhile

Q7 · 요리 습관 변화

Full Simulation 15

레시피 의존도, 남는 재료, 현재의 대체 방식과 장점을 비교하세요.

How have your cooking habits changed? Compare how you cooked before with how you cook now.

IL

I used to follow recipes exactly. Now I use what I have and adjust the seasoning.

IM

In the past, I bought every ingredient listed in a recipe. Now I check what I already have and make simple changes. I waste less food and feel more confident in the kitchen.

IH

When I first started cooking, I depended on detailed recipes and measured everything carefully. This was helpful, but it often left unused ingredients. Now I understand basic methods better, so I substitute similar items and adjust the amount. Cooking has become more flexible and practical.

AL

My cooking has become much more flexible. At first, I treated recipes like strict instructions and bought every ingredient even if I needed only a small amount. The meals usually worked, but the refrigerator filled with leftovers that did not fit another plan. Over time, I learned which ingredients could replace one another and which steps were essential. Now I look at what I have, choose a basic method, and adjust the seasoning as I go. I still use recipes when trying something new, but they serve as guides rather than rules. This approach saves money, reduces waste, and makes cooking less intimidating.

CHECK · serve as a guide / reduce waste

Q8 · 날씨와 일상

Full Simulation 15

선호하는 기온과 하늘 상태를 제시하고 이동, 심리, 계획에 미치는 영향을 설명하세요.

What kind of weather do you prefer, and how does it affect your daily activities?

IL

I prefer mild and sunny weather. I can walk outside comfortably and do errands without carrying much.

IM

I like mild weather with clear skies and a light breeze. It makes walking and outdoor errands comfortable. I also feel more energetic because I do not have to worry about extreme heat or heavy rain.

IH

My favorite weather is a cool, clear day with little wind. I can walk outside without special equipment and keep my plans flexible. Comfortable weather also encourages me to finish errands on foot rather than taking transportation for a short distance.

AL

I prefer mild weather that is cool enough for a comfortable walk but warm enough that I do not need heavy clothing. On those days, ordinary plans feel easier. I can walk to a nearby store, spend time in the park, or change my route without worrying about sudden discomfort. Extreme weather tends to make every activity more complicated because I have to plan transportation, clothing, and timing carefully. Good weather does not create free time, but it helps me use the time I have more actively. I usually return home feeling more refreshed and less confined by my schedule.

CHECK · keep my plans flexible / extreme weather

Q9 · 날씨 돌발 경험

Full Simulation 15

예보와 실제 날씨의 차이, 즉시 피한 장소, 교통 대안과 이후 습관을 서술하세요.

Describe a time unexpected weather disrupted your plans. What happened, and how did you respond?

IL

I once planned a walk, but heavy rain started. I waited in a cafe and went home by bus.

IM

I once went out for a long walk because the forecast looked clear. Heavy rain suddenly began. I found a nearby cafe, checked the bus schedule, and changed my plan. I arrived home safely.

IH

One afternoon, I planned to walk through a park, but dark clouds appeared much faster than expected. The rain became heavy before I reached the main entrance. I went into a nearby cafe, dried my jacket, and checked public transportation. Instead of waiting for the storm to end, I took a bus home.

AL

One afternoon, I planned a long walk because the forecast showed only a small chance of rain. Halfway to the park, the sky changed quickly and heavy rain began. I had a small umbrella, but the wind made it nearly useless. Rather than continuing and getting soaked, I entered a nearby cafe and checked the radar and bus schedule. The rain was likely to last, so I canceled the walk and took a bus home. I was disappointed, but changing the plan early kept a minor inconvenience from becoming a miserable trip. Since then, I have checked short-term weather updates before leaving.

CHECK · change the plan early / short-term weather updates

Q10 · 계절 적응

Full Simulation 15

여름, 겨울, 폭우 상황을 각각 이동 시간과 정보 확인 행동으로 구체화하세요.

How do people in your area prepare for different seasons or extreme weather? Give specific examples.

IL

People use fans in summer and warm clothes in winter. They also check weather alerts before traveling.

IM

In summer, people avoid the hottest hours and use fans or air conditioning. In winter, they wear layers and check road conditions. During heavy rain, many people change travel plans after reading weather alerts.

IH

People prepare differently depending on the season. During hot summers, they plan outdoor errands early and carry water. In winter, they wear layers and pay attention to icy roads. When heavy rain or strong wind is expected, local alerts help residents adjust commuting and delivery plans.

AL

Seasonal preparation in my area is mostly about timing and information. During very hot weather, people move outdoor errands to the morning or evening, carry water, and check whether older family members are comfortable. In winter, layered clothing is common, but road and sidewalk conditions matter just as much. Heavy rain creates another set of problems, so residents monitor alerts and avoid routes that flood easily. Businesses also adjust delivery and pickup times when conditions are unsafe. These habits may seem ordinary, but they reduce unnecessary risk. The most useful preparation is often making a reasonable change before the weather becomes severe.

CHECK · monitor alerts / reduce unnecessary risk

Q11 · 온라인 쇼핑 정보 문의

Full Simulation 15

상품 재고, 총비용, 조립, 배송일, 반품 조건을 실제 구매 정보로 나누어 질문하세요.

You want to order a desk chair from an online store. Call customer service and ask four or more questions about the chair, delivery, assembly, returns, and total cost.

IL Hello, I am interested in a desk chair. Is it in stock? How much is delivery? Does it need assembly? Can I return it?

IM Hello, I am calling about a desk chair on your website. Is the gray model in stock? What is the total price with delivery? Does it arrive assembled? Also, how many days do I have to return it?

IH Hello, I am interested in the adjustable desk chair listed on your website. Could you confirm whether the gray model is available? I would like to know the total price, including delivery. Does the chair require assembly, and are the tools included? Finally, what is your return period if the chair is uncomfortable?

AL Hello, I am calling about the adjustable desk chair shown on your website. Before I place an order, could you confirm whether the gray model is currently in stock? I would also like to know the full price, including delivery and any assembly fee. Does the chair arrive fully assembled, or will I need to put it together myself? If assembly is required, are the necessary tools and instructions included? Approximately how long would delivery take to my area? Finally, if the chair is uncomfortable or does not fit my desk, how many days would I have to return it, and who would pay the return shipping?

CHECK · the full price / return shipping

Q12 · 온라인 쇼핑 문제 해결

Full Simulation 15

동일 주문의 파손과 누락을 설명하고 부품 긴급배송, 전체 교환, 환불·무료회수 대안을 제시하세요.

The desk chair arrived with a damaged wheel and one missing part. Call customer service, explain the problem, and suggest two or three solutions while keeping the same order context.

IL

Hello, my chair arrived damaged and a part is missing. Please send the parts, replace the chair, or give me a refund.

IM

Hello, I received the desk chair today, but one wheel is cracked and a screw is missing. Could you send replacement parts quickly? If that is not possible, please exchange the chair. I would also accept a full refund.

IH

Hello, I am calling about the desk chair I ordered. It arrived today, but one wheel is damaged and an important screw is missing. I cannot assemble it safely. Could you send the correct parts by express delivery? If that will take too long, please arrange an exchange. Otherwise, I would like a refund and free return pickup.

AL

Hello, I need help with the desk chair from my recent order. The package arrived today, but one of the wheels is cracked and a bolt listed in the instructions is missing. I stopped assembly because the chair would not be safe to use. My first choice would be to receive the correct wheel and bolt by express delivery, with a confirmed tracking number. If those parts are not available immediately, could you exchange the entire chair and collect this one at no cost? If neither option can be completed this week, I would like a full refund and a prepaid return pickup. Please tell me which solution you can confirm today.

CHECK · express delivery / prepaid return pickup

Q13 · 온라인 쇼핑 관련 경험

Full Simulation 15

전화 질문이 아니라 과거 사건으로 답하고 확인 자료, 문의 행동, 교환 결과를 순서대로 서술하세요.

Tell me about a past experience when an online order arrived damaged, incomplete, or different from what you expected. Explain what you did and how it ended.

IL

I once received the wrong size item. I took photos, contacted the store, and exchanged it.

IM

I once ordered a storage box, but the delivered item was much smaller than the product description. I checked the order, took photos, and contacted customer service. The store sent the correct size and collected the first box.

IH

A past online order went wrong when I received a smaller storage box than the size I had selected. I compared the label with my confirmation and took clear photos. Customer service admitted the warehouse error and arranged an exchange. The correct item arrived two days later.

AL

A few years ago, I ordered a large storage box online because I needed it for seasonal clothing. When the package arrived, the box was clearly smaller than the measurements on my confirmation. Before contacting the store, I compared the product label, the website description, and my order receipt. I took photographs showing the measurements and sent them through the support form. The representative confirmed that the warehouse had shipped the wrong model. They scheduled a pickup and sent the correct box two days later. The issue was resolved smoothly because I kept the order details and provided clear evidence instead of describing the problem vaguely.

CHECK · order confirmation / provide clear evidence

Q14 · 주거 환경 비교

Full Simulation 15

지원과 소속감, 사생활과 독립성을 같은 기준으로 비교하고 선호하는 균형점을 제시하세요.

Compare living in a close-knit neighborhood with living in a more private residential area. Which would you prefer and why?

IL

A close neighborhood feels friendly, while a private area feels quiet. I prefer a balance with polite neighbors and personal space.

IM

In a close-knit neighborhood, people share information and help each other. A private area may be quieter and less demanding. I prefer friendly contact without too much involvement because I value both support and personal space.

IH

A close-knit neighborhood can provide useful support and a strong sense of belonging. However, frequent interaction may feel demanding to people who value privacy. A more private area offers independence but can feel less connected during a problem. I would choose a balanced community with clear boundaries.

AL

The main difference is how much daily contact residents expect. In a close-knit neighborhood, people may notice problems quickly, share information, and offer practical help. That support can be valuable, especially for families or older residents. However, constant involvement can also reduce privacy. A more private residential area gives people independence and quiet, but residents may feel isolated when they actually need assistance. My preference is a middle ground. I want neighbors who greet one another, communicate about shared concerns, and help in a real emergency, while still respecting closed doors and personal schedules. For me, community works best when support is available without becoming an obligation.

CHECK · a middle ground / respect personal space

Q15 · 생활 편의 의견

Full Simulation 15

접근성과 선택 폭의 장점, 포장·반품·지역 상점의 단점을 제시하고 실천 가능한 기준으로 결론 내리세요.

Some people say online shopping has improved everyday life, while others say it creates waste and weakens local stores. What is your opinion?

IL

Online shopping is convenient, but it creates packaging waste. People should use it carefully and support local stores too.

IM

Online shopping saves time and gives people more choices. However, frequent small orders create packaging and delivery traffic. I think people should combine orders and buy locally when the product is easy to find nearby.

IH

Online shopping has made everyday purchases easier, especially for people with limited time or mobility. The downside is unnecessary packaging, returns, and pressure on local businesses. I support using it selectively, combining deliveries, and choosing nearby stores for simple items.

AL

Online shopping has clearly improved access and convenience. It helps people compare products, find specialized items, and avoid unnecessary travel when time or mobility is limited. At the same time, the convenience can hide real costs. Repeated small deliveries create packaging waste and traffic, while easy returns may cause additional transportation. Local stores also lose routine purchases that help them remain part of the community. I do not think the answer is to reject online shopping. I think consumers should use it deliberately by combining orders, checking product details to reduce returns, and choosing local businesses when they offer a practical alternative. Convenience is most valuable when it is used responsibly.

CHECK · use it selectively / combine orders
